

Himanshi Agrawal

+91-8791418502 — himanshiagrawal222@gmail.com — GitHub — LinkedIn — LeetCode

Summary

Motivated 3rd-year Information Technology student with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Machine Learning. Passionate about building AI-powered applications and seeking Software Development or Machine Learning internship opportunities.

Skills

Languages: C, C++, Python, SQL

Web: HTML, CSS, JavaScript, React.js, Tailwind CSS, Node.js

Libraries/Tools: Scikit-learn, Pandas, NumPy, Matplotlib, Streamlit, Git, GitHub, Google Earth Engine

Core Concepts: Data Structures, Algorithms, OOP, DBMS, Machine Learning

Projects

AI Population Estimator | Individual Project

Jun 2026

Python • Scikit-learn • Google Earth Engine • Streamlit • NASA VIIRS

- Developed an end-to-end Machine Learning application to estimate the population of Indian cities using **NASA VIIRS Night-Light satellite imagery**.
- Collected and processed satellite imagery for **354 Indian cities** using Google Earth Engine and engineered brightness-based features for model training.
- Trained a **Random Forest Regression** model using Scikit-learn and evaluated performance with MAE, RMSE and R^2 metrics.
- Built and deployed an interactive Streamlit dashboard that provides city-wise population prediction, satellite feature visualization, and model insights.
- **Project Links:** GitHub Repository

Live Demo

Z.E.N.T.A.R.A. | Group Project

Nov 2025 – Present

MERN Stack • Sustainability • Reward System

- Developing a sustainability platform featuring eco-friendly shopping and an upcycled products marketplace.
- Designed a GreenPoints reward system that encourages eco-friendly activities and allows users to redeem rewards.
- Promotes the circular economy by connecting waste generators, recyclers, cafés, NGOs, and eco-entrepreneurs.

Experience

AI & Data Analytics Intern

Aug 2025 – Sep 2025

AICTE — Shell India — Edunet Foundation

- Built a Machine Learning model using rainfall, temperature, and water-level datasets to predict flood risk.
- Preprocessed and analyzed raw datasets using Python and Excel before model training.
- Implemented and compared Random Forest and Logistic Regression models for prediction accuracy.

Awards & Certifications

- **Guidewire DEVTrails University Hackathon (2026):** Cleared two competitive rounds demonstrating strong problem-solving and teamwork.
- **SunHacks International Hackathon (2025):** Ranked among the Top 150 teams out of 3,000+ participants.
- **Cyber Security Analyst – Cisco Networking Academy (2025):** Learned networking, cybersecurity fundamentals, threat detection and incident response.
- **Certificate of Participation (2024):** Revive and Thrive Event conducted by Institution's Innovation Council (IIC).

Education

B.Tech in Information Technology

2024 – 2027

GL Bajaj Institute of Technology and Management, Greater Noida

CGPA: 8.28

Diploma in Engineering (Computer Science)

2021 – 2024

Aligarh Muslim University, Aligarh

CGPA: 8.7
